5.0 ★ Classic GUI SCP access to your servers

I've been using this program for years. After 7-Zip it is one of the first programs that gets installed on any new machine. Makes moving files between a linux system and my windows system trivial. Nice graphical interface, and access from the desktop to the server. The program is very easy to use. The program is very easy to use. The program is very easy to use.

Simply the best FTP client around for years now. Always happy to support the development of powerful and open source software :)

Here I get an opportunity to purchase WinSCP for half price – I assume that gives me the same rights as if I purchase it for full price because this is a sale. Meaning that I don't have to pay the full \$9 to get the updates. Am I correct? I click on the BLUE CAD \$6.39

This is the bottom of the list and as you can see from here there is no Canada on the list (OR USA).

I scroll up to the top of the list.

And again, no Canada to select.

It seems to go off track at the Microsoft store when I select Canada – the United Kingdom Box Pops up. You have a terrific product. I've paid over \$8 CDN already which is nearing full price. If automatic updates is not included, that's not the end of the world. I've been manually updating for years but have never been able to donate or purchase until now. Thanks again for a wonderful product!
